Summary

Results-oriented and innovative Web Developer with 2 years experience in both front end and back end. Proficient in JavaScript(React), Next.js 13, HTML5, CSS3, and Tailwind CSS. Hands-on experience on CI/CD and AWS. Self-motivated, embrace challenges and eager to learn new skills and technologies.

Visa Status

Australian Permanent Resident Visa

Key Skills

- **Languages:** JavaScript, TypeScript
- **Front End:** HTML5, CSS3, React, Redux, Next.js, Tailwind CSS
- **Back End:** Node.js, Express, Restful API, TanStack, Prisma
- **DB:** SQL, PostgreSQL, MongoDB
- **Tools:** AWS, Git, Webpack, Jenkins

Project Experience

Ebay Clone

Built an Ebay clone website to allow users to login, browse products, add products to cart, add/modify address, checkout and show purchased orders.

Achievements:

- Completed the front end pages and components using **Next.js 13**.
- **Context** of **React.js** was introduced to manipulate the functions and variables on the user and cart pages.
- Implemented **Prisma** and **PostgreSQL** on backend to create and access database
- Utilized **Supabase** to manage user authentication and database.
- Processed the payment using **Stripe**.

Live Posting and Commenting System

Created a full stack live posting and commenting system to allow users to share messages with the world.

Achievements:

- **Next.js 13** was harnessed to execute CRUD operations and implement SSR.
- Utilized **TanStack React Query** for efficient handling of asynchronous communication between the frontend and backend.
- Implemented **Prisma** and **PostgreSQL** on backend to create and access database.
- **Next Auth** was introduced to manage user creation and authentication.

Basic Web Crawler

Developed a web crawler to navigate a specific website, utilizing Puppeteer to extract titles and text, then display the data on a webpage. Involved in both frontend and backend development.

Achievements:

- Built a frontend webpage using **React**, **TypeScript**, and **Echarts** to visualize extracted data.
- Designed and implemented essential controllers and decorators in **Node.js** and **TypeScript** for seamless crawling.
- Established **RESTful APIs** using the **Express** framework in **Node.js**.

Backend Github Link: [*https://github.com/timeseven/crawler-backend*](https://github.com/timeseven/crawler-backend)

Global News Administration System

Designed a comprehensive global news admin system with features including access management, data analysis, user roles, and news publication using **React** and **Ant Design**.

Achievements:

- Implemented dynamic routes based on user roles using **React Router**.
- Executed **CRUD** operations for effective management functionality.
- Utilized **Redux** to manage states across components.
